

## HELICOBACTER PYLORI TREATMENT #3(RADICATE)

Take the following medications:

- – Omeprazole 40 mg (1 tablet 30 minutes before breakfast and 1 tablet 30 minutes before dinner)
- – Levofloxacin 250 mg with breakfast
- – Alinia 500mg (1 tablet with lunch and 1 more with dinner)
- – Doxycycline 100 mg ( 1 tablet with breakfast and 1 more with dinner)

This treatment is for **10 days**. Please **DO NOT** skip any doses.

After treatment, please wait 10 days to do the H. pylori breath test. DO NOT take any PPI (example: omeprazole, pantoprazole, protonix, prilosec,...) during these 10 days.

Please feel free to call us to set an appointment after treatment or if you have any questions.

Thank you!
