

HELICOBACTER PYLORI TREATMENT #1

Take the following medications two times a day (in the morning and in the evening):

- 1 – Omeprazole 40 mg
- 2 – Amoxicillin 500 mg
- 1 – Clarithromycin 500 mg

This treatment is for **14 days**. Please **DO NOT** skip any doses.

After treatment, please wait 10 days to do the H. pylori breath test. DO NOT take any PPI (example: omeprazole, pantoprazole, protonix, prilosec,...) during these 10 days.

Please feel free to call us to set an appointment after treatment or if you have any questions.

Thank you!
